 NO. 5-822-13  
 AIR FORCE JOINT MANUAL  
 NO. 32-1018

HEADQUARTERS  
 DEPARTMENT OF THE ARMY  
 AND THE AIR FORCE  
 WASHINGTON, DC, 24 October 1994

**PAVEMENT DESIGN FOR ROADS, STREETS, AND OPEN STORAGE AREAS,  
 ELASTIC LAYERED METHOD**

	Paragraph	Page
CHAPTER 1. GENERAL		
Purpose . . . . .	1-1	1-1
Scope . . . . .	1-2	1-1
References . . . . .	1-3	1-1
Computer Program . . . . .	1-4	1-1
CHAPTER 2. BASIS OF PAVEMENT DESIGN		
Design Principles . . . . .	2-1	2-1
Design Variables . . . . .	2-2	2-1
Pavement Response Model . . . . .	2-3	2-1
Frost Considerations . . . . .	2-4	2-2
CHAPTER 3. VEHICULAR TRAFFIC		
Effect on Pavement Design . . . . .	3-1	3-1
Vehicle Representative Configurations . . . . .	3-2	3-1
Traffic Evaluation . . . . .	3-3	3-1
CHAPTER 4. ELASTIC MODULI OF PAVEMENT MATERIALS		
Climatic Factors . . . . .	4-1	4-1
Material Characterization . . . . .	4-2	4-2
Nondestructive Testing Procedure . . . . .	4-3	4-7
CHAPTER 5. DESIGN CRITERIA		
Damage Factor . . . . .	5-1	5-1
Vehicle Operations . . . . .	5-2	5-1
Concrete Pavement . . . . .	5-3	5-1
Flexible Pavement . . . . .	5-4	5-1
CHAPTER 6. FLEXIBLE PAVEMENT DESIGN		
Design Requirements . . . . .	6-1	6-1
Determination of Pavement Thickness . . . . .	6-2	6-1
Design Example for a Conventional Flexible Pavement . . . . .	6-3	6-2
Design Example for an All-Bituminous Concrete (ABC) Pavement . . . . .	6-4	6-2
Design Details . . . . .	6-5	6-4
CHAPTER 7. CONCRETE PAVEMENTS		
Application . . . . .	7-1	7-1
Design Procedure . . . . .	7-2	7-1
Design Procedures for Stabilized Foundations . . . . .	7-3	7-1
Reinforced Concrete Pavements . . . . .	7-4	7-2
Design Examples . . . . .	7-5	7-2
Joints . . . . .	7-6	7-6
Design Details . . . . .	7-7	7-6

**This publication with special software (app D) has a value of less than \$100.00 per copy, and does not require accountability under provision of AR 735-17 and AR 710-2-1.**

	Paragraph	Page
CHAPTER 8. OVERLAY PAVEMENTS		
General . . . . .	8-1	8-1
Definitions for Overlay Pavement Design . . . . .	8-2	8-1
Preparation of Existing Pavement . . . . .	8-3	8-1
Rigid Overlay of Existing Rigid Pavement . . . . .	8-4	8-1
Rigid Overlay of Flexible and Composite Base Pavements . . . . .	8-5	8-3
Flexible Overlay of Rigid Base Pavements . . . . .	8-6	8-3
Flexible Overlay of Flexible Pavements . . . . .	8-7	8-3
APPENDIX A: REFERENCES . . . . .		A-1
APPENDIX B: PROCEDURE FOR DETERMINING THE MODULUS OF ELASTICITY OF UNBOUND GRANULAR BASE AND SUBBASE COURSE MATERIALS . . . . .		B-1
APPENDIX C: PROCEDURES FOR DETERMINING THE FATIGUE LIFE OF BITUMINOUS CONCRETE . . . . .		C-1
APPENDIX D: COMPUTER AIDED DESIGN FOR PAVEMENT DESIGN . . . . . FOR ROADS, STREETS, AND OPEN STORAGE AREAS, ELASTIC LAYERED METHODS . . . . .		D-1

**List of Figures**

Figure 4-1. Relationships Between Design (Mean) Pavement Temperature . . . . . and Design Air Temperature.	4-2
4-2. Prediction of Asphalt Concrete Modulus for Bituminous Layers . . . . .	4-3
4-3. Relationship Between Equivalent Cracked Section Modulus and . . . . . Unconfined Compressive Strength.	4-5
4-4. Correlation Between Resilient Modulus of Elasticity and Static . . . . . Modulus of Soil Reaction.	4-6
5-1. Subgrade Strain Criteria for Roads and Streets . . . . .	5-4
7-1. Reinforced Concrete Pavement Design . . . . .	7-3
8-1. Chart for Determining $C_r$ for Concrete Overlays . . . . .	8-2
8-2. Chart for Determining $C_b$ for Flexible Overlays . . . . .	8-4
8-3. Determination of Effective k Value on Top of Base Course . . . . .	8-5
8-4. Chart for Determining F-factor for Flexible Overlays . . . . .	8-6
B-1. Relationships Between Modulus of Layer n and Modulus of . . . . . Layer n + 1 for Various Thicknesses of Unbound Base Course and Subbase Course.	B-2
C-1. Repeated Flexure Apparatus . . . . .	C-2
C-2. Initial Mixture Bending Strain Versus Repetitions to Fracture in . . . . . Controlled Stress Tests.	C-3
C-3. Provisional Fatigue Data for Bituminous Base Course Materials . . . . .	C-3

**List of Tables**

Table 3-1. Representative Configuration Data . . . . .	3-2
4-1. Minimum Unconfined Compressive Strengths for Cement, Lime, and . . . . . Combined Lime-Cement Flyash Stabilized Soils.	4-4
4-2. Modulus of Soil Reaction . . . . .	4-5
5-1. Operations Per Coverage Ratio, Flexible Pavements . . . . .	5-2
5-2. Operations Per Coverage Ratio, Rigid Pavements . . . . .	5-3
6-1. Strain Values and Damage for Trial Thicknesses . . . . .	6-3
6-2. Bituminous Concrete Moduli for Each Month for ABC Pavement Design . . . . . Based on Bituminous Concrete Strain.	6-4
6-3. Bituminous Concrete Moduli for Each Month for ABC Pavement Design . . . . . Based on Subgrade Strain.	6-5

List of Tables (Continued)

	Paragraph	Page
Table 6-4. Strain Values and Damage for ABC Pavement, 32-kip Tandem-Axle . . . . .		6-6
Dual Wheels.		
7-1. Computed Design Coverages for Example 2 . . . . .		7-4
7-2. Computations of Cumulative Damage for Example 2 . . . . .		7-5
7-3. Cumulative Damage Computed for M1 Tank . . . . .		7-6
7-4. Computed Design Coverages for Example 4 . . . . .		7-7
7-5. Computations of Cumulative Damage for Example 4 . . . . .		7-8
